COURSE DESCRIPTION:

O-305 – Type 3 All-Hazard Incident Management Team (AHIMT)

Course Description: This five-day course provides students with a solid foundation of the activities, processes, leadership elements, and the knowledge, skills, and abilities (KSAs) necessary to function within the framework of a Type 3 All-Hazard Incident Management Team (AHIMT) deployed to an incident or planned event. The course is considered fast-paced, highly interactive, and challenging as the students, formed into the Command and General Staff positions on an All-Hazards Incident Management Team, navigate through multiple activities and rapidly expanding incident scenarios. The course includes a comprehensive review of the roles and responsibilities of each of the Incident Command System (ICS) Command and General Staff positions, their roles as leaders of their sections or functional areas, leadership and teambuilding, and decision-making under stress. A significant portion of time is spent explaining the Planning Process, each step within the process, the roles, and responsibilities of each ICS position within the process, and the deliverables expected from them (based on their ICS position on the team) at the conclusion of each step. Multiple scenarios are used throughout the class to provide the students with opportunities to practice each step of the Planning Cycle, conduct the meetings and briefings, and produce multiple Incident Action Plans (IAPs).

Target Group: The target audience of this course is entry level participants who are new to an assignment on an AHIMT. Although the course is intended to be a basic introduction to AHIMTs, participants should have a foundational understanding of the Incident Command System.

Course Prerequisites: Students should have a working understanding of the ICS and the Command and General Staff positions that make up an All-Hazards Incident Management Team. Minimum student qualifications for O-305 include completion of:

- IS-100
- IS-200
- ICS-300
